**PLACEMENT TEST
TEACHER INSTRUCTIONS**

A Writing

1. Students attempt the writing paper first.

B Grammar and reading

1. Instructions on the test procedure can be given to the students in their own language if it's appropriate.
2. The grammar and reading placement test consists of five separate parts. Students do not write on the test paper, but mark the correct letter on the answer sheets.
3. After *each part* of the test, the supervising teacher marks the students' answers and tells them whether they should go on to the next part.
4. The final total is out of 60, however many parts the student has been allowed to complete.

Match the final total with the level indicators below, and compare them with the result of the writing paper to make a final judgement on the student's placement.

GRAMMAR AND READING Totals out of 60.	WRITING Totals out of 40.
